1. INTRODUCTION

1.1 Purpose

This document provides airplane characteristics data for general airport planning. Since the operational practices vary from one airline to the other, specific data should be coordinated with the using airlines before the facility design is made.

EMBRAER should be contacted for any additional information required.

1.2 Scope

This document complies with NAS3601, revision 6.

It provides characteristics of the EMB-135BJ aircraft model for airport operators, airlines, and engineering consultant organizations. Since the airplane changes and the available options may have different information, the data presented herein must be regarded as subject to change.
